WORK EXPERIENCE

Katz Web Solutions LLC

Westport, CT

Founder, CEO

August 2024 – Present

- Founded a web development agency specializing in building modern, responsive websites for small businesses.
- Managed client outreach through cold outreach campaigns, securing contracts with restaurants and other local businesses to enhance their online presence.
- Engineered automated business workflows, reducing manual administrative tasks and streamlining client management processes.

Aether Devs LLC

Remote, CT

Software Engineer

July 2024 – February 2026

- Engineered multi-platform software solutions, developing cross-platform systems using web, desktop and mobile applications to expand product reach across various environments.
- Designed high-throughput backend microservices and relational database schemas to process complex computational tasks for multi-tenant SaaS environments.
- Built automated background data pipelines to handle real-time data flow, system syncs, and large-scale event processing.

Nodus Web Services

Remote, CT

Software Developer

October 2023 – June 2024

- Architected full-stack enterprise web services, focusing on server-side rendering logic and high-concurrency API integrations.
- Optimized data retrieval layers by implementing multi-level caching strategies and database index tuning to maintain sub-100ms query performance.
- Integrated complex third-party platforms, including secure payment processing systems, authentication protocols, and headless content management systems.
